

EDUCATION

[University of Lagos, Nigeria.](#)

B.Sc. Computer Science(CGPA: 4.6/5.0)

SKILLS/TECHNOLOGIES

Python, TypeScript, JavaScript, C, Django Framework, NodeJS, Flask, FastAPI, Flask, XML, RESTful API, PostgreSQL, Generative AI, MS SQL Server, GIT, Microsoft Azure , HTML & CSS, Excel, CI/CD, Azure OpenAI, Semantic Kernel

WORK EXPERIENCE

Software Engineer - [Guaranty Trust Bank Plc | Squad - Payment Solutions For All Businesses](#) Aug 2024 – Aug 2025

- Built and managed the **Django-powered backend** for the **Fashion Weekend platform**, optimizing APIs and database queries to accelerate data processing by 25%.
- Optimized **backend workflows** with Python scripting, streamlining operations and improving system efficiency by 20%.
- Delivered a reliable platform used by 500+ participants, receiving positive feedback for seamless performance

Software Engineer - [Team Nigeria 2024 - FIRST Global.](#)

Apr 2024 – Oct 2024

- Engineered and programmed an X-drive and lift mechanism using **Java and block-based programming**, applying **software design principles** to optimize precision and efficiency.
- Collaborated with a multidisciplinary team to develop **scalable control systems**, leveraging **Kalman filter algorithms** to improve robot mobility and performance under competition constraints.
- Represented Nigeria at the **FIRST Global Challenge (FGC) World Finals** with 100+ countries, earning awards that recognized innovation, technical excellence, and teamwork.

Software Engineering Intern - [Microsoft, Victoria Island, Lagos, Nigeria](#)

Aug 2023 – Sep 2023

- Created a **sensor-driven waste management system** with streamlined alerts, **leveraging embedded programming and backend integration** to improve efficiency by 35%.
- Designed and optimized **data transmission pipelines** for **sensor-to-server communication**, boosting system reliability by 30%.
- Led a team of five engineers, applying agile practices to coordinate development, ensure scalability, and deliver the project on schedule.

PROJECTS

Vital Aid- [Link](#)

A platform that helps users find the nearest hospital via geolocation, access first-aid guidance, and generate police reports to improve emergency response and reduce preventable deaths in Nigeria.

- Constructed backend services for **geolocation-based hospital recommendations and emergency data handling**, ensuring scalability and reliability under time-critical conditions.
- Integrated **chatbot-driven first-aid guidance** and **enhanced police report generation**, enhancing accessibility and usability for diverse users.
- Utilized the following technologies: **TypeScript, NodeJS, PostgreSQL**

ACHIEVEMENTS AND EXTRACURRICULAR

[Meta Llama Accelerator Program](#) - [Meta](#)

Aug 2025 – October 2025

- Esteemed as **one of Nigeria's top 10 startups** out of 1,000+ with **Verifi**, a platform that instantly verifies documents and assigns credibility scores for application readiness.
- Engineered the **backend and shaped the platform's design**, enabling fast, secure, and reliable document verification at scale

2nd Runner Up in Microsoft Azure AI Hackathon and Cardano Blockchain Hackathon [Link](#)

May 2025

- Microsoft AI Skills Challenge: Selected from 700+ candidates to participate in intensive Azure AI training; collaborated in a team to build a **Regulatory Compliance Tracker using Azure AI**, earning **\$3,285 (₦5,000,000)** and **2nd Runner Up out of 10 teams**.
- Cardano Sandbox Hackathon: Developed **FarmFi**, a blockchain-based harvest traceability platform enhancing transparency and trust in agriculture; team named **2nd Runner Up out of 25 teams**, awarded **\$657 (₦1,000,000)**.
- Gained hands-on experience in **generative AI, Azure OpenAI, Semantic Kernel, and blockchain integration**, demonstrating the ability to deliver innovative solutions under tight timelines.

1st Position in Fusion Tech Fest Hackathon - Gen Z Techies [Link](#)

Jan 2025

- Pioneered a **web application** facilitating access to nearby hospitals, first-aid instructions, and automated police report generation; projected to **reduce preventable deaths by 5%** in the target region.
- Developed backend services, **integrated geolocation APIs**, and implemented an **AI-driven chatbot**.
- 1st place out of 200+ participants** at the hackathon for innovation and impact

Excellence and Collaboration Award- Microsoft - [Link](#)

Aug 2023

- Selected as 1 of 20 interns from 2,200 applicants at Microsoft**, demonstrating **exceptional technical skill and potential**.
- Led a team during the internship and was acknowledged with **Excellence and Collaboration awards** among all 20 interns for outstanding performance and teamwork.
